Domains: Supply Chain, Procurement & Sourcing, Order Management, Fulfillment, RFQ Workflows, B2B Marketplaces, Supplier Management, E-commerce, Warehouse Management Systems (WMS), Fintech, Consumer Apps

Experience

7 years 4 Months

Product Manager — Apr 2025 – Jul 2026
Birla Pivot (Aditya Birla Group)

Lead post-order platform initiatives across procurement and Seller Portal, with a focus on automation and seller self-serviceability

- Designed *an NLP-based intent classification* and response parsing system across WhatsApp/email to automate POD collection; increasing **adoption** from **7% to 47%** and also **saving 260+ CX man-hours**
- Owned and built an *AI-driven risk-scoring engine* (Gemini API) with defined confidence thresholds and human-in-the-loop review for flagged cases, evaluating sellers across 9 risk categories and **flagging 15% of newly onboarded sellers** monthly
- Shipped *an OCR-to-structured-data extraction pipeline* with confidence-scored line-item matching against order, processing 200+ invoices/day and **cutting manual reconciliation by 50%**+; built fallback logic for low-confidence extractions requiring human review
- Launched Seller Managed Inventory, RFQ & Price Upload module with batch-level traceability and real-time visibility across RFQ and order workflows driving **INR 3Cr+ monthly GMV across** 1,100+ private label SKUs within 2 months of launch.
- Owned and delivered end-to-end integration of warehouse management system (WMS), defining data sync and schema contracts between OMS and WMS across inward, outward, and GRN, for real-time consistency; enabling **INR 2Cr+ per month** in warehouse revenue
- Built **import order** platform for offshore sourcing and fulfilling products from sellers. Facilitating orders worth **USD 1M+ by GMV** in last 6 months

Product Manager — Apr 2022 – Apr 2025
Moglix

Owned supplier platforms and order management automation, including rule-based supplier selection, and RFQ-to-order workflows.

- Scaled order creation automation **from 22% to 70%** by building rule engines for supplier selection, pricing, and delivery dates eliminating **1,600+ manual hours/month** across ops teams
- Introduced the first-ever *"One-Touch Supplier Order Release"* feature at Moglix, reducing average order release TAT *from 8 minutes to under 1 minute* and **saving 200+ man-hours** per month. A flawless deployment with zero issues reported since release.
- Launched **Open Purchase Order (Open PO)** functionality for a strategic customer. Improved process flexibility and removed redundancy to punch subsequent SPOs. **40 man-hours** saving, doubling **GMV to INR 6 Cr. a month.**
- Rolled out *Late Delivery Charge Automation* flow, generating **INR 1Cr in additional revenue over 12 months** through precise application of late delivery penalty.
- Created supplier risk profiling engine using analytical scoring (behaviour, GST history, OTIF, past defaults) to improve supplier recommendations and **increase OTIF by 15%**
- Launched seller self onboarding workflows and bridged critical gaps in the user journey and launched supplier awareness programs, driving a **55% increase in user adoption** through targeted engagement and training.
- Designed and implemented **a multi-channel communication system** across Email, WhatsApp, SMS, and Push, creating user journeys and trigger-based messages to enhance engagement and responsiveness.
- Enhanced supplier inventory management by introducing product, price recommendations to seller catalog achieving a **40% increase in usage,** and generating an **additional INR 2L** in revenue per month

Associate Product Manager — Dec 2021 – Apr 2022
Pristyn Care

Worked across app, chatbot, and IVR. Worked on patient journey to book doctor consultations, and OPD

- Conceptualized and launched features to increase user acquisition and create UGC on **Pristyn Care App**. App rating moved from 3.4 to 4.4. Cumulative user ratings increased by 4X in 3 months.
- Implemented and integrated website **chatbot** on webpages and deployed central **IVR. 65% increase** in leads conversion

Managed end-to-end adoption and tracking of Consumer Products Vertical (B2C), app, IVR and Chatbots

- Build CoWIN Vaccination Slot booking and Rt-PCR test booking module in Pristyn Care App. Reached **2X growth in daily app installs** and **100% increase in DAU MoM.**

Business Analyst Nov 2020 – Dec 2021
LeasePlan India

- Built process-automation tools for auctions, consolidating payment & collection operations and saving **150+ manhour/month.**
- Utilized data-driven techniques to optimize the annual and monthly planning and forecasting of used car sales, resulting in a cash flow **variance of less than 5%** from the forecasted values

Manager – Digital Lending Product Mar 2019 – Nov 2020
Capital Trust Limited

Business Loan and Personal Loan Product Integration

- Streamlined product delivery of MBL (Micro Business Loans), by ideating and releasing product dashboard after studying **user journey.** Led to improved arrears **collections by 20%**
- Improved **TAT** for collection remittance to the partner bank. **Achieved ≈ 95%** remittance within 3 days of receiving by integrating and monitoring client cash cycle with product portal and dashboard
- Digitized foreclosure process to product portal and reduced TAT for timely intimation of foreclosure cases from **15 days to then 1 day**
- Led digitization of repayment from cash to digital through ECS mandate. Significantly reduced the number of cheques for repayment from **18k to less than 900** in 3 months
- Designed and improved the digital receipt (DR) issuing process and interface of Capital Sales app after **understanding customer behavior and journey**. Cases of the wrong receipt issued by collection agents **dropped by close to 65%**

Side Projects

SarkariPath: *Government job discovery platform* **|** ***sarkari-path.vercel.app***

- Built and shipped independently using Claude Code, automated scraping pipeline aggregating government job listings, deployed on Vercel.
- Hands-on experience with AI-assisted development, prompt-driven coding workflows, and end-to-end product ownership outside a corporate environment
