MANU PRATAP

Product Manager | Marketplace, Supply Chain and AI Enabled Platform Products
+91 9917322444 | manupratap.knit@gmail.com | linkedin.com/in/manu-pratap | manu-pratap.vercel.app
Bengaluru, India | Open to Gurugram, Noida, Hyderabad, Mumbai and Pune

SUMMARY

Product Manager with 7+ years building marketplace, supply chain and operations platforms, including AI enabled workflows with confidence thresholds and human review. Comfortable with data (SQL, Excel) to find where manual effort and defects sit, then fix them. At Moglix, automated **90% of line items** through rule engines, removing **5,400+ manual hours a month** (about 30 FTE), and cut OMS issues from 50+ to under 5 a month. At Birla Pivot, owned the OMS and WMS integration, the Seller Managed Inventory and Price Upload module, and AI systems for POD collection, invoice extraction and seller risk scoring. Immediately available.

SKILLS

Product: Product Management, Product Strategy, PRDs, MVP Definition, Roadmaps, Prioritisation, User Research, Experimentation, A/B Testing, Stakeholder Management, Agile/Scrum, Jira, OKRs, KPIs

Platform and Technical: API and Integration Requirements, OMS/WMS/IMS Integration, Data Sync and Schema Contracts, Bulk Upload Workflows, Catalog Management, Quality Control Workflows, Rule Engines, Workflow Automation, Process Automation

Domains: Marketplaces, Seller Platforms, Order Management, Warehouse Management Systems (WMS), Procurement and Sourcing, E-commerce, Supply Chain, Fintech (Digital Lending and Collections)

Tools: Jira, Confluence, Figma, Claude Code

WORK EXPERIENCE

Product Manager, Post-Order and Seller Platforms, Birla Pivot (Aditya Birla Group)

Apr 2025 to Jul 2026

B2B marketplace platform: Seller Portal, OMS, IMS/WMS and cross-border fulfilment

- Designed an NLP-based intent classification and response parsing system across WhatsApp and email to automate POD collection, taking adoption from **7% to 47%** and saving **800+ CX man-hours**
- Shipped an OCR-to-structured-data extraction pipeline with confidence-scored line-item matching against orders, processing **200+ invoices a day** and cutting manual reconciliation by **50%+**; built fallback logic that routes low-confidence extractions to human review
- Built an AI-driven seller risk-scoring engine (Gemini API) with defined confidence thresholds and human review for flagged cases, evaluating sellers across 9 risk categories and flagging **15% of newly onboarded sellers** monthly
- Owned end-to-end integration of the warehouse management system (WMS) with the OMS, defining data sync and schema contracts across inward, outward and GRN for real-time consistency; enabling **INR 2Cr+ per month** in warehouse revenue
- Launched Seller Managed Inventory, RFQ and Price Upload module with batch-level traceability and real-time visibility across RFQ and order workflows, driving **INR 3Cr+ monthly GMV** across 1,100+ private label SKUs within 2 months of launch
- Built the import order platform for offshore sourcing and fulfilment of products from sellers, facilitating orders worth **USD 1M+ GMV** in 6 months

Product Manager, Vendor and Order Management, Moglix

Apr 2022 to Apr 2025

B2B industrial e-commerce: supplier platforms and the internal OMS used by 500+ ops users

- Built order creation automation, automating **90% of line items** through rule engines for product and supplier selection, pricing and delivery dates, eliminating **5,400+ manual hours a month** across ops teams, translating into **30 FTE savings**
- Introduced One-Touch Supplier Order Release, cutting average order release TAT from **8 minutes to under 1 minute** and saving **200+ man-hours a month**; zero issues reported since release
- Stabilised the OMS, **cutting issues from 50+ to under 5 a month** within 3 months by grouping them into root-cause buckets and fixing each bucket, making it reliable and scalable for 500+ ops users
- Launched seller self-onboarding workflows and supplier awareness programs, driving a **55% increase in user adoption** through targeted engagement and training, with no formal authority over suppliers or ops
- Launched Open Purchase Order functionality for a strategic customer, removing redundancy when punching subsequent SPOs, saving 40 man-hours and doubling GMV to **INR 6 Cr a month**
- Introduced product and price recommendations in the seller catalog, lifting usage by **40%**
- Rolled out Late Delivery Charge Automation, generating **INR 1Cr additional revenue** over 12 months through precise application of late delivery penalties
- Built a supplier risk profiling engine using analytical scoring on behaviour, GST history, OTIF and past defaults, increasing **OTIF by 15%**

Associate Product Manager, Consumer Products, Pristyn Care

Dec 2021 to Apr 2022

Health-tech: consumer app, chatbot and IVR, with the patient journey for doctor consultations and OPD booking

- Launched features that moved app rating from **3.4 to 4.4**, with **4X cumulative ratings** in 3 months
- Implemented website chatbot and central IVR, driving a **65% increase in leads conversion**
- Owned end-to-end adoption and tracking for the consumer vertical across app, IVR and chatbots

- Built CoWIN vaccination slot and Rt-PCR test booking module, reaching **2X growth in daily app installs** and **100% increase in DAU MoM**

Business Analyst, LeasePlan India Nov 2020 to Dec 2021

- Built process-automation tools for auctions, consolidating payment and collection operations and saving **150+ man-hours a month**
- Optimised annual and monthly used car sales planning, keeping cash flow variance under **5%** of forecast

Manager, Product-Digital Lending, Capital Trust Limited Mar 2019 to Nov 2020

Business Loan and Personal Loan Product Integration

- Released a product dashboard for Micro Business Loans after studying the user journey, improving arrears collections by **20%**
- Improved collection remittance TAT to the partner bank, reaching **about 95% remittance within 3 days** of receipt by integrating and monitoring the client cash cycle with the product portal and dashboard
- Led digitisation of repayment from cash to ECS mandate, cutting cheques from **18k to under 900** in 3 months
- Digitised the foreclosure process on the product portal, reducing intimation TAT from **15 days to under 1 day**
- Redesigned the digital receipt process and Capital Sales app interface, cutting wrong receipts issued by collection agents by **about 65%**

SIDE PROJECT

SarkariPath, government job discovery platform | sarkari-path.vercel.app

Built and shipped independently using Claude Code: an automated scraping pipeline aggregating government job listings from central and state portals into one searchable place, deployed on Vercel.

EDUCATION

MBA (Marketing, Analytics, Strategy), **Indian Institute of Management Kashipur** 2017 to 2019
